B TECH	KSRM COLLEGE OF ENGINEERING	83	2024
MPC	JAGAN'S JR COLLEGE	94	2020
SSC	Z.P.H.S MACHANAPALLI	93	2018

PROJECT DETAILS:

○ Project name: TOFU CART

Description: Tofu cart are the most common income source for a migrated villagers in cities. Not only migrated people so many common people who want to earn without degrees can choose this way more. Tofu carts are our ancestor's gift to earn money by selling goods by roaming streets on foot. In past tofu carts are moved by either pushing or pulling manually, but now as per the present generation's technology the tofu carts are advanced by setting up motor cycle it is easy to move from one place to another. But this facility is not utilized by every individual. Only few people who can afford the fuel for the motor cycle are only using this opportunity. The remaining workers are using the old versioned tofu carts.

In that remaining people, all range of aged people are there. Mostly middle aged and old aged people are working hard to feed their families. Most of them are physically weak and ill. Even though they have to carry that cart with their own hands, its been a lot burden to them and their life span will be lessen eventually.

So to make their work easy we are going to invent a motor to the Tofu cart. For essay to move form initial place to destine . there is no burden to the user on transporting. So they can sell their products very easily and also they can go more places on short time.

SKILLS:

- Quick Learner
- Problem Solving
- Responsibility
